

Child Care First Aid Course (1 day)

Would you know what to do if a baby started choking or a child stopped breathing or had a bad cut? This 1 day course is suitable for those who require knowledge and skills of emergency first aid for children and babies. Similar to the emergency first aid course, it includes the latest child and baby protocols and common paediatric illnesses.

Course Content:

- Roles and responsibilities of a paediatric first aider
- Vital signs
- Dealing with emergencies
- Safe airway position
- Resuscitation (CPR)
- Choking
- Bleeding and shock
- Burns
- Minor injuries
- Seizures
- Anaphylaxis
- Common child and baby illnesses
- First aid kit contents

What to expect and what to bring:

All Fieldskills courses involve some practical elements. In the case of first aid this may be just some bending and lifting inside the classroom, in other courses this may involve working outside in rough or even remote terrain. Clients are reminded of the importance of operating within their abilities and informing Fieldskills of any medical or other issues which may affect their active participation.

This course is a combination of teaching and hands on practical sessions. Any clients who are unable to take part in activities such as kneeling, being rolled over as a simulated casualty or simulated CPR on manikins should let us know.

For the purpose of certification please bring a form of identification, for example, an I.C. card.
